RIDE-ON POWER TROWEL

ALPHA CONCOKIT 351046

BIG TORQUE. HEAVY WEIGHT. MIRROR FINISH.

2 × 1170mm	35HP	180rpm	520kg
46-INCH TROWEL DISCS	VANGUARD V-TWIN	DISC SPEED	NET WEIGHT

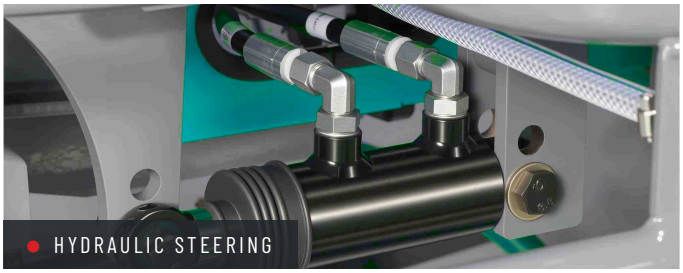

OVERVIEW

POWER TO THE PANS. PRECISION IN YOUR HANDS.

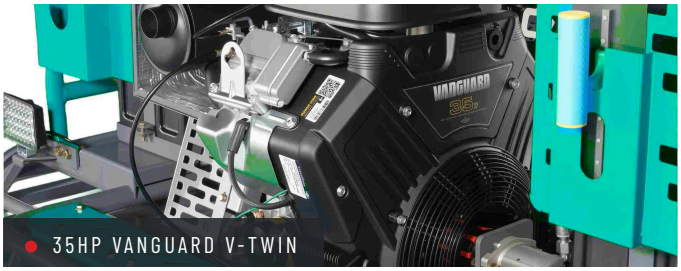

The **Alpha Concokit 351046** delivers big torque to spin dual **1170mm (46-inch)** trowel discs. Ergonomic dual-axis hydraulic joysticks give effortless, precise manoeuvring – with none of the fatigue of lever steering. And at **520kg**, it bears down hard to compact thick slabs and burnish them to a mirror-like gloss.

01 HYDRAULIC JOYSTICK CONTROL

Heavy-duty hydraulic joysticks respond instantly, with accurate tracking around edges, columns and obstacles. Steer all day without the strain.

HYDRAULIC STEERING

35HP VANGUARD V-TWIN

02 35HP BRIGGS & STRATTON V-TWIN

A Vanguard 35HP V-twin engine supplies the big torque needed to drive dual 1170mm discs through large, demanding pours.

03 8-BLADE CONFIGURATION

Eight 460×145×2.0mm blades put more steel on the slab, for high productivity on large industrial floors.

04 180RPM DISC SPEED

A 180rpm disc speed delivers gloss finishes and tight surface sealing when hard-troweling.

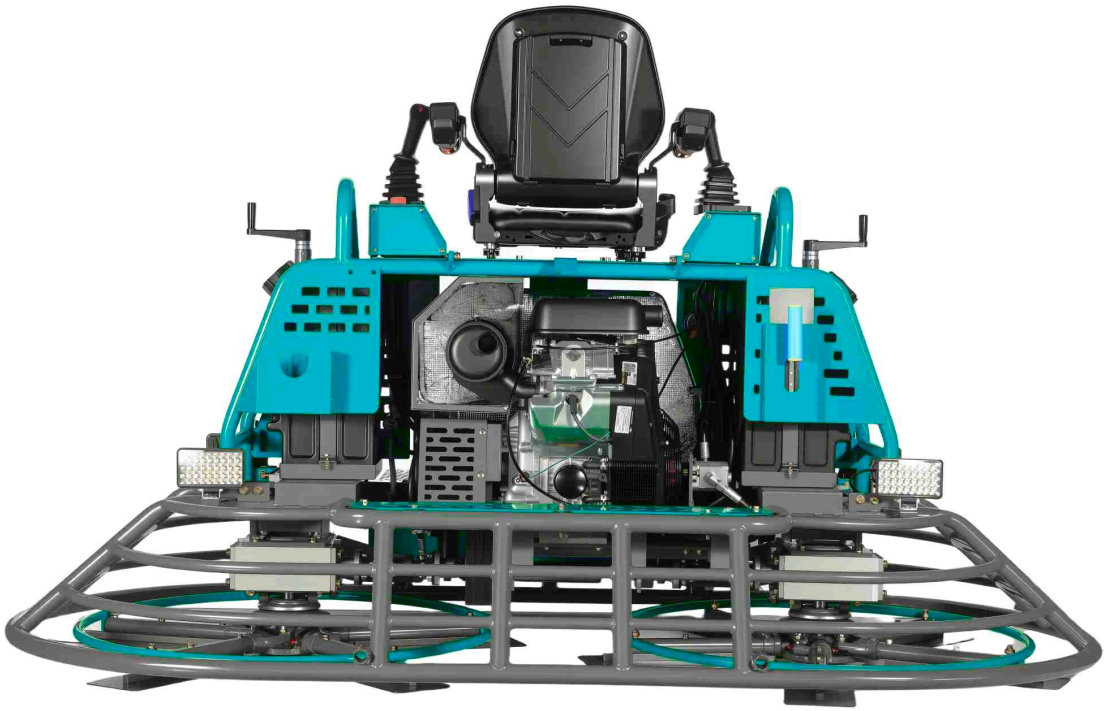

05 HEAVY STEEL CHASSIS

The heavy steel chassis pushes down coarse aggregate and draws paste up to the surface – giving you a denser, harder, more durable floor.

TECHNICAL DATA

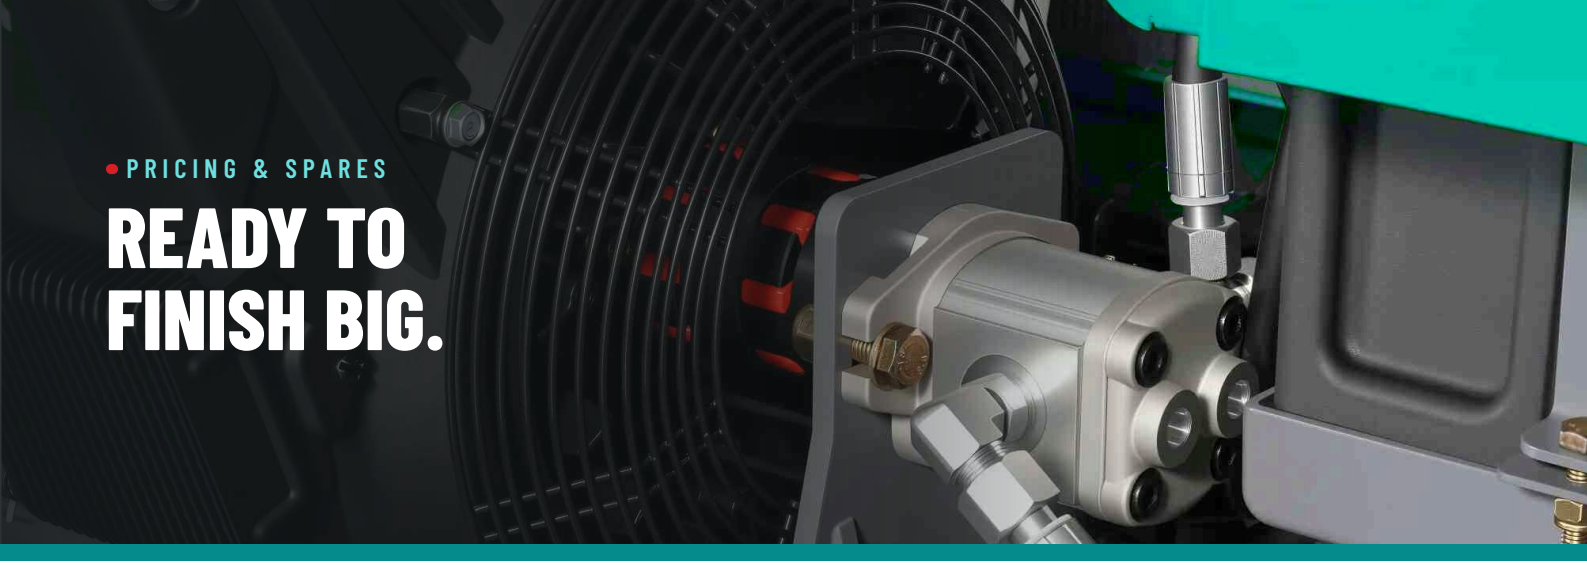

SPECIFICATION

REAR VIEW · VANGUARD V-TWIN ENGINE BAY

35 HP	1170 mm	180 rpm	520 kg
ENGINE POWER	TROWEL DISCS (×2)	DISC SPEED	NET WEIGHT

SPECIFICATION	ALPHA CONCOKIT 351046
Engine	Briggs & Stratton
Power	35hp
Blades	8pcs
Trowel disc size	1170mm
Disc speed	180rpm
Blade size	460 × 145 × 2.0mm
Net weight	520kg
Overall dimensions	2500 × 1250 × 1530mm

PRICING & SPARES

READY TO FINISH BIG.

RETAIL PRICE
